National Register of Historic Places Registration Form

This form is for use in nominating or requesting determinations of eligibility for individual properties or districts. See instructions in *Guidelines for Completing National Register Forms* (National Register Bulletin 16). Complete each item by marking "x" in the appropriate box or by entering the requested information. If an item does not apply to the property being documented, enter "N/A" for "not applicable." For functions, styles, materials, and areas of significance, enter only the categories and subcategories listed in the instructions. For additional space use continuation sheets (Form 10-900a). Type all entries.

1. Name of Property

Current Functions (enter categories from instructions)

DOMESTIC: single dwelling

7. Description

Architectural Classification

(enter categories from instructions)

OTHER: early 20th-century commercial building

Materials (enter categories from instructions)

foundation BRICK

walls BRICK

roof METAL: tin

other

Describe present and historic physical appearance.

The two-story brick commercial structure is located on the north side of VA Route 659 in the railroad village of Vicker. The building features a parapet shed roof, segmentally arched one-over-one double-hung sash windows, and wood bracketed cornices at the top of the principal (south) front and between the first-floor storefront and the three-bay second-floor facade. Access to the residential second floor is gained from a porch supported by turned posts at the northeast corner of the building. Two-story additions were made in the mid-twentieth century to the rear (north) and west side. The wood storefront has been partially altered in the center to allow for the insertion of a garage door, but the transom and side windows are intact.

The interior of the store incorporates horizontal beaded tongue-and-groove boards in the ceiling and rear partition, reeded doorway and window opening trim, and bull's-eye corner-blocks. Access to the second-floor apartment is gained by concrete steps up the sloping ground to the east of the building. The outbuildings consist of a noncontributing concrete privy structure, dating from the mid-twentieth century, and a contributing board-and-batten hip-roofed outbuilding, both to the immediate rear (north) of the building and related to its secondary function as a residence. There is a non-contributing shed near the northwest corner of the property.

8. Statement of Significance

Certifying official has considered the significance of this property in relation to other properties:

nationally statewide locally

State significance of property, and justify criteria, criteria considerations, and areas and periods of significance noted above.

The Hornbarger Store is significant under criterion C, as an unusually well-preserved example of a popular early twentieth-century commercial form. The building was built in 1910-11 by Edward Hornbarger to serve the Vicker community. The community of Vicker, also known as Vicker's Switch, developed along the railroad between the town of Christiansburg and the city of Radford in the late nineteenth century. Of the more than fifty commercial structures surveyed from the early twentieth century, over half were built of brick. The Hornbarger Store represents the commercial vitality of the small community of Vicker as a result of the advent of the railroad and its continued influence in the region. It is the best preserved of two commercial buildings surviving in the community. The alterations to the rear of the structure do not affect its significant form and details.
