DESCRIBE THE PRESENT AND ORIGINAL (If known) PHYSICAL APPEARANCE

Cradock is a geographically well-defined planned community located in the southern end of the city of Portsmouth. Busy highways bound it on the south, east and west, while its northern boundary is marked by Paradise It is mainly a working-class neighborhood consisting of some ninety Creek. residential blocks with a small commercial area in the center. The main street pattern is in the general form of an anchor with the main thoroughfare, Afton Parkway forming the shank. The parkway, a divided street with landscaped median, bisects the town, but is interrupted in the center by Afton Park, the town square. Located on the square is a fanciful bandstand, the town's focal point and symbol. Also on the square is the library and firehouse building. Around the square's eastern end is the small commercial area. At the western end of afton Park is the major lateral thoroughfare, Prospect Parkway, also a divided street with landscaped median. The vista at the northern end of Prospect Parkway is terminated by the junior high school, while the southern vista is closed by the elementary school. Tn contrast to the wider thoroughfares most of the residential streets are narrow and gently curved to provide a quiet domestic atmosphere. This atmosphere is enhanced by the mature trees that line nearly every street.

Cradock's housing generally consists of single-family dwellings on fifty foot lots. The houses are simple and small, but are commodious. The architects kept the residential area from being monotonous by providing several styles of houses including modified English Cottage, Bungaloid, Dutch Colonial and Colonial Revival. Of the 1235 houses originally planned for the community 759 were completed. Nearly all are of frame construction.

The commercial strips that have grown up around Cradock have tended to draw business away from the original shopping area. As a result the commercial buildings present a somewhat deteriorated face. Efforts are underway, however, to return vitality to the commercial area. The rest of the community is relatively well maintained. A strong community pride persists, and neighborhood associations have contributed to keeping up the visual quality of the area. 10

Cradock is a well preserved example of one of the nation's first Government-built community projects. Conceived as a model community, it incorporated many of the most advanced planning techniques of its day. The town came into existence as a result of the rapid influx of workers at the Norfolk Naval Shipyard during World War I. An Act of Congress of 1918 allowed the Federal Government to build housing projects related to the wartime effort. Accordingly, the United States Housing Corporation began planning Cradock since the adjacent town of Portsmouth was not equipped to handle sudden increases in population. Similar activity took place across the James River near Newport News with the construction of Hilton Village.

The community was laid out according to the design of the distinguished New York architectural firm of George B. Post and Sons, who also designed many of the buildings. Assistance in the design was provided by the United States Housing Corporation. The engineering firms for the project were Hill and Ferguson, and G. C. and A. E. Wheeler. The site chosen for the community was a 310 acre farm about three miles south of Portsmouth on Paradise Creek. It was connected to Portsmouth by a streetcar line leading directly to the Shipyard. This line, in turn, was attached to the existing system covering all of Portsmouth and its major suburbs, making Cradock part of an early mass-transit system.

Cradock was named in honor of British Rear Admiral Sir Christopher G. F. W. Cradock whose fleet was sunk by the German Navy in 1914. The street layout was designed in the form of an anchor with Afton Parkway, one of the major thoroughfares, being the anchor's shank. The streets intersecting Afton were alphabetically arranged and were named for naval heros such as Decatur and Farragut. In the center, at the intersection of Afton and Prospect Parkways, was Afton Park, which, with its bandstand, served as a community gathering point. Most of the features of present-day planned communities including schools, recreational areas, churches, a commercial area, and public transportation system were provided for Cradock. All of the facilities were planned to be within walking distance of one another. The lines either The town was a pioneer in use of concealed utility lines. were placed under median strips or behind houses to make them inconspicuous. The town had its own Government-built schoolhouse, firehouse, sewerage and water system, and electric street lighting system. Afton Parkway, the major traffic boulevard, also carried the streetcar line. Prospect Parkway was built as a residential and promenade street. Gillis Road was a long diagonal street stretching from the far end of the community to Paradise Creek where a bridge was planned to connect Cradock directly to the Shipyard and downtown The bridge was never built as the Government dropped its Portsmouth.

sponsorship of the Cradock project following the Armistice.

Cradock unsuccessfully attempted self-government after the War, and in 1922 its administration was taken over by Norfolk County. Today it is part of the city of Portsmouth, but a strong community pride has enabled Cradock to maintain a separate identity. Although the streetcar system no longer exists, the community has changed little in character and appearance since 1918, which is a testament to the quality of its design. Following a period of decline in recent years, it currently is experiencing a return to its original status as a desirable place to live.
