This stone Beaux-Arts library consists of a tall central dome over an octagonal base with a three arched-entrance porch below diagonally facing the traffic intersection. Two wings fronted by porches with Ionic colonnades flank the dome and entrance and follow the line of the two streets to the north and west. Above both colonnades are ballustrading and steep singlepitched roofs pierced by oval dormer lights. The ends of the wings are accented by slightly projecting pavilions consisting of arched windows flanked by pilasters with figures and a shield in heavy relief above. Swags and panels of fruit, also in heavy relief, occur occasionally around windows and doors but are dominated by the heavy-handed classicism of the dome, columns and pilasters. The rear of the ell-shaped building is brick with the stacks partially filling up the area behind the dome.

The interior is centered on the three-story dome room with its colored glass inner dome, now covered by a temporary wooden floor due to its deterioration. This area serves as the reception and check-out area and library offices flank the room on the first and second levels. The book stacks, located directly opposite the entranceway, consist of five levels with glass floors to take advantage of the window light. The two wings are used as reading rooms and feature projecting wooden-paneled chimney walls. The basement area under the stacks has a small auditorium with a stage.

STATEMENT OF SIGNIFICANCE (Include Personages, Dates, Events, Etc.)

The Handley Library was a gift to the city of Winchester from Judge John Handley, who although born in Ireland, was a resident of Scranton, Pennsylvania. Judge Handley greatly admired Virginia and its style of life. With only several brief visits to Winchester he came to identify with the town and its Scotch-Irish heritage. In his will he left money for the erection of a great library "for the free use of the people of the city of Winchester." Although Handley died in 1895, the library was not begun until 1908. The architects for the building were J. Stewart Barney and Henry Otis Chapman of New York.

Completed in 1913, the library is one of the outstanding examples of Beaux-Arts design in Virginia with its monumental French classicism performed in a sophisticated manner. The building was remarkably advanced for its time with its fine facilities and fireproof construction. It is important to Winchester in its domination of a well-traveled intersection and its contrast with the smaller 19th Century domestic and commercial architecture of the area.
