NATIONAL REGISTER OF HISTORIC PLACES REGISTRATION FORM

This form is for use in nominating or requesting determinations for individual properties and districts. See instructions in How to Complete the National Register of Historic Places Registration Form (National Register Bulletin 16A). Complete each item by marking "x" in the appropriate box or by entering the information requested. If any item does not apply to the property being documented, enter "N/A" for "not applicable." For functions, architectural classification, materials, and areas of significance, enter only categories and subcategories from the instructions. Place additional entries and narrative items on continuation sheets (NPS Form 10-900a). Use a typewriter, word processor, or computer, to complete all items.

1. Name of Property

historic name Remington Historic District

other names/site number VDHR #288-5001

2. Location

street & number Area including parts of E. Bowen Street, W. Bowen Street, N. Church Street, N. Franklin Street, N. John Stone Street, E. Main Street, W. Main Street, South Mill Street, Sumerduck Road, Tinpot Run Lane, E. Washington Street, and W. Washington Street. not for publication N/A

Narrative Description (Describe the historic and current condition of the property on one or more continuation sheets.)

8. Statement of Significance

Applicable National Register Criteria (Mark "x" in one or more boxes for the criteria qualifying the property for National Register listing)

- A** Property is associated with events that have made a significant contribution to the broad patterns of our history.
- B** Property is associated with the lives of persons significant in our past.
- C** Property embodies the distinctive characteristics of a type, period, or method of construction or represents the work of a master, or possesses high artistic values, or represents a significant and distinguishable entity whose components lack individual distinction.
- D** Property has yielded, or is likely to yield information important in prehistory or history.

Criteria Considerations (Mark "X" in all the boxes that apply.)

- A** owned by a religious institution or used for religious purposes.
- B** removed from its original location.
- C** a birthplace or a grave.
- D** a cemetery.
- E** a reconstructed building, object or structure.
- F** a commemorative property.
- G** less than 50 years of age or achieved significance within the past 50 years.

Areas of Significance (Enter categories from instructions)

- ARCHITECTURE** _____
- COMMERCE/TRADE** _____

SUMMARY DESCRIPTION:

The Remington Historic District is located in the town of Remington, in the southwestern part of Fauquier County, about a ½ mile from the Rappahannock River. Remington, one of three incorporated towns in the county, is situated on the main line of the old Alexandria and Orange Railroad (now the Norfolk Southern Railroad), about 13 miles south of Warrenton. Remington is laid out in a grid and the district boundaries are drawn to include the majority of historic resources in the town. Excluded are areas that contain a large number of non-contributing resources, such as part of Main Street and James Madison Highway. The district includes 84 properties, with a total of 158 resources, consisting primarily of late-19th- and early-20th-century dwellings, churches, and commercial buildings that illustrate the town's growth and development.

The Remington Historic District contains four linear areas of residential buildings as well as the part of East Main Street that is primarily commercial. Although a community existed here shortly after the arrival of the Alexandria and Orange Railroad in the 1850s, only one resource survives from that time period, due mainly to the destruction the town experienced during the Civil War and several early-20th-century fires. Remington was incorporated in 1890, and it was during the two following decades that the town really developed. Many residential buildings from that time period survive. Two early-20th-century commercial buildings are located in the district, but the majority date to the 1910s and later.

The vast majority of buildings in the 49-acre district date from the late 19th and early 20th centuries and include common architectural styles and forms of the period such as the Queen Anne, the I-house, and the L- and T-shaped house. The degree of architectural decoration varies from resource to resource, but in general, the buildings in Remington tend to be fairly ornamental, especially when compared to buildings in other similar towns in the county. Common Victorian-era decorative features found on many houses include corbelled chimneys, metal or slate shingles used as roofing material, towers, projecting Queen Anne bays, wooden and pressed tin shingles or decorative wooden panels in the gable ends, and sawn and turned woodwork in porch detailing.

Although subject to flooding due to its proximity to the Rappahannock River, Remington is a well-preserved late-19th-century town that by the early 20th century had assumed much of its present character. It contains a wide range of building types and architectural styles that are typically found in mid-sized rural communities of this era. Most streets in town have sidewalks

United States Department of the Interior
National Park Service

National Register of Historic Places
Continuation Sheet

Remington Historic District
Fauquier County, Virginia

Section 7 Page 4

and mature vegetation. The set back of dwellings along the residential streets is generally uniform with well-landscaped front lawns and outbuildings in the rear yards. The commercial buildings, mainly located along East Main Street, generally sit directly off the sidewalk with little or no set back. Some of these commercial buildings are free standing, while others are directly adjacent to their neighboring buildings. Archaeological resources are not included in this nomination.

ARCHITECTURAL ANALYSIS

Remington is one of three incorporated towns in Fauquier County and is located in the southwestern end of the county, close to the Culpeper County line. The area was settled in the early to mid-19th century and from 1839 was known as Millview, in reference to a mill that stood on the nearby Rappahannock River. The community was renamed Bowensville around 1850, and became known as Rappahannock Station after 1852 when the Orange and Alexandria Railroad was completed through town. In 1890 the name was changed once more, this time to Remington. According to one account, the name Remington was chosen because the citizens liked the way it sounded, while another story maintains it was chosen in honor of a well-liked railroad conductor named Captain Remington.

Remington was officially chartered in March of 1890, and a new charter approved in March of 1932. Despite the fact that several fires and floods have destroyed buildings in Remington, a varied collection of historic dwellings, commercial buildings, and churches survive in the town. The district boundaries generally include the core grid of Remington. Areas along James Madison Highway, now business Route 15/29, have been excluded due to the concentration of non-contributing resources along it. New residential construction has generally been limited to the area outside of the proposed boundaries.

Although the area around Remington was settled earlier in the 19th century, it didn't grow significantly and develop as a town until after its incorporation in 1890, as is evidenced by the surviving architectural resources. The 84 properties in the Remington Historic District depict the community much as it was during the early to mid-20th century. Of the historic properties, one dates to the antebellum period (ca. 1850), 54 to the Reconstruction and Growth Period (1865 to 1914), 22 to the period of World War I to World War II, and 7 to the period since 1941. The district contains a total of 134 contributing resources and 24 non-contributing ones, most of which are primarily modern outbuildings.

Section 7 Page 5

The most common construction material in the district is wood except for the commercial buildings that are predominantly masonry. The vast majority of the resources in the district are of the vernacular tradition but many of them share similar architectural design elements that are characteristic of the late 19th century and early 20th century. In some cases, this suggests that they were constructed at about the same time and perhaps by the same builder. The district also contains some noteworthy examples of the Queen Anne, Gothic Revival, and Classical Revival styles. As a whole the resources in the district are surprisingly sophisticated for a rural town of this size in Virginia's Piedmont.

The earliest house that survives in the district is the central portion of the Rouse House [288-5001-0050], located along West Main Street. There were certainly other early dwellings in the community at one time, but this is the only one that appears to have survived. The oldest portion is a 1 ½-story, 2-bay structure with a large exterior-end stone chimney with brick stack, now the central part of the house (**Photo 1**). Constructed in the mid-19th century, it was enlarged during the late 19th century with the addition of a 2-story cross-gable-roofed wing that features gable-end returns, an interior-end brick flue, and 2/2-sash wood windows. One of the most interesting features of the Rouse House is the well house that is connected to the rear of the dwelling by a 6-bay porch. The interior of the small gable-roofed frame outbuilding with overhang contains a trough used to hold water in order to keep perishable items cool.

Much of Remington was destroyed during the Civil War and although it continued as a commercial center for the surrounding rural area, it really wasn't until the 1880s that large-scale new construction began to occur. Sixty-four percent of the properties in the district date to the period of ca. 1880-1914, reflecting the time of the town's greatest development.

The only resource in the district from the 1870s in the district is the Remington Methodist Church [288-5001-0070]. The congregation was organized in 1868 and they constructed the church in 1872. It is of the Gothic Revival-style with its characteristic cross-gable-roofed form, Gothic-arched windows, overhanging eaves with brackets, and a square entrance bay with a bell tower. The building was enlarged and remodeled in later years including the 20th-century application of a brick veneer all around the building.

The Episcopal congregation in Remington constructed a rectory in 1860 with the idea of building a church next. The outbreak of the Civil War delayed plans for the church and in 1864 the rectory

United States Department of the Interior
National Park Service

Continuation Sheet

Remington Historic District
Fauquier County, Virginia

Section 7 Page 6

and the materials for the church were destroyed. The cornerstone for the current St. Luke's Episcopal Church was not laid until 1881 and the church was consecrated in 1888. Standing on the west side of North Church Street, the 1-story, 3-bay, 4-bay-deep, frame church combines Gothic Revival- and Romanesque Revival-style detailing [288-5001-0069]. It demonstrates a wealth of exterior decoration that is typical of the late 1880s, with the exception of the crenellated bell tower that replaced the original steeple in 1937. These features include a decorative vergeboard in the front gable end, overhanging eaves with knee braces, a steeply-pitched gable roofed, a gable-roofed hood over the entry supported by wooden brackets, and round-arched multi-light windows on the side bays (**Photo 2**). Next door to the church is the Parish Hall [288-5001-0068], a gable-end frame building constructed at around the same time.

The Remington Baptist Church, a fine brick structure located at 203 East Marshall Street [288-5001-0083], bears a cornerstone with the date of 1884, although the congregation had been organized ten years earlier (**Photo 3**). The building, which is laid in 5-course American bond, combines Romanesque Revival-, Gothic Revival-, and Greek Revival-stylistic elements in its eclectic design. The prominent front gable end has gable-end returns and a projecting rectangular entrance and bell tower bay with double-leaf doors on the first floor, a large triple square-headed window above it, and a round attic window. An octagonal bell tower with Gothic-arched louvered vents and brackets topped by a conical spire rests on top of the projecting bay. The 4-bay sides of the building feature tall, round-arched windows.

Several dwellings constructed in the 1880s are included in the district: an abandoned, vernacular, frame house on North Franklin Street [288-500-0004] that was constructed in two sections; a house along Sumerduck Road [288-500-0042] that is of the vernacular I-house form and features exterior-end brick chimneys; and 105 East Washington Street, a fairly extensively altered dwelling built for William Bowen, a large landholder in the area. Two other dwellings from the 1880s that survive in the district are much more sophisticated and attest to the growing wealth of the community during this period.

The House at 300 North Franklin Street [288-5001-0007] was constructed ca. 1888 and is one of the district's most ornate residential dwellings. The 2-story, L-shaped, frame building uses elements of the Gothic Revival style in its exterior decoration (**Photo 4**). This is particularly evident in the cross-gable ends that feature very ornate half-timbering and other applied wood trim. The house also contains several interior brick chimneys with elaborately corbelled caps and a 3-bay front porch with a steeply-pitched gable with wood shingles in the pediment as well as a

United States Department of the Interior
National Park Service

National Register of Historic Places
Continuation Sheet

Remington Historic District
Fauquier County, Virginia

Section 7 Page 7

pent roof. The front entrance features a door surround with Eastlake-style designs and a transom and sidelights. Although the original weatherboard has been covered in aluminum siding, the rich architectural detailing of the house is extremely well preserved and makes it one of the most interesting houses in Remington.

The Daniels House at 105 East Main Street [288-5001-0034] was also constructed ca. 1888. It is much more subdued in its use of architectural decoration than 300 North Franklin Street, looking back to the Late Greek Revival style for its inspiration instead of to the more popular Victorian styles of the late 1880s (**Photo 5**). The 2-story, 2-bay, frame dwelling is dominated by a full-width front pediment. The majority of the decoration is found at the 4-octagonal-paneled front door surrounded by a 4-light transom, 3-light sidelights, and bracketed wooden surround. The windows are all 4/4-sash except for the full-height 4/8-sash window under the front porch and the projecting 1-story polygonal bay window on the east side. The Colonial Revival-style porch with Tuscan columns seems to be a later addition. This large well-preserved dwelling is an important visual landmark along East Main Street and is directly adjacent to the commercial district of the town.

By the time of Remington's incorporation in 1890, numerous other buildings had been built or were under construction, particularly along North Franklin Street. The House at 207 East Bowen Street [288-5001-0003] is associated with the Bowen family, who during the mid-19th century owned most of the land on which Remington is located. While the main house is a simple 2-story, 3-bay, gable-roofed vernacular I-house, the property is significant for its collection of outbuildings, which includes two barns, a corncrib, a summer kitchen, a garage, a meat house, as well as an intact farm courtyard northeast of the house (**Photo 6**).

The district contains 32 properties that were constructed during the two decades following incorporation, attesting to the growth and development that occurred during that period. These not only include dwellings but commercial buildings as well, that have survived despite three fires in the town. Existing resources from these two decades include thirteen houses along North Franklin Street, eight on West Main Street, six on North Church Street, and five on Washington Street.

Eight dwellings along North Franklin Street were constructed ca. 1890, most of which are vernacular in form with limited architectural detailing. The house at 204 North Franklin [288-5001-0008] is a vernacular 2-bay dwelling with side wing, while the house at 200 North

United States Department of the Interior
National Park Service

National Register of Historic Places
Continuation Sheet

Remington Historic District
Fauquier County, Virginia

Section 7 Page 8

Franklin [288-5001-0010] is a fairly large vernacular frame dwelling. The houses at 106 North Franklin [288-5001-0011] and 205 North Franklin Street [288-5001-0014] are both T-shaped dwellings with cross-gabled roofs and decorative woodwork in the cross gable ends. The same is true of 207 North Franklin Street which is L-shaped and is one of the best preserved dwellings on the street. The most ornate of the group is 301 North Franklin Street [288-5001-0017], which still maintains much of its Victorian-era detailing although the original siding has been concealed with a modern brick veneer. Five other dwellings on North Franklin Street were constructed by the beginning of World War I. They include: 401 North Franklin Street [288-5001-0020] a good example of the Queen Anne style featuring a pyramidal-roofed projecting front bay; 403 North Franklin [288-5001-0021] and 405 North Franklin Street [288-5001-0022], two vernacular L-shaped dwellings with hipped roofs and lower cross gable roofs almost identical in form; and 407 North Franklin Street [288-5001-0023] and 105 North Franklin Street [288-5001-0012] both early-20th-century, vernacular, hall-parlor-plan dwellings.

The district includes several examples of vernacular I-houses, popular forms for dwellings of the period. Typically two stories in height and three or five bays wide, these symmetrical dwellings usually have a central-passage plan that is one room deep. Rear wings were often added for expansion and varying amounts of exterior decoration could be added to the eaves, gable ends, and porches of these buildings. The house at 106 East Main Street [288-5001-0037] features a 2-story projecting pedimented front porch, doors on the central bay of both the first- and second-floor façade, sidelights and transoms around the doors, 2/2-sash windows, and a rear 2-story wing. The house at 101 West Washington Street [288-5001-0074] is smaller in size and is characterized by a central-front gable, exterior-end brick chimney, 6/1-sash windows, and a rear 2-story ell (**Photo 7**). The house at 404 North Franklin Street [288-5001-0005] also features a central front gable. Moved to its current location in 1959, 101 North John Stone Street [288-5001-0084] is an example of an I-house with minimal exterior decoration.

Three examples of the vernacular hall-parlor plan, another popular late-19th- and early-20th-century form, are found along West Main Street. These include 102 West Main Street [288-5001-0047], 400 West Main Street [288-5001-0056], and 402 West Main Street [288-5001-0057].

The most common form for dwellings of this period in Remington is cross-gable-roofed ones with either a T-shaped or L-shaped plan. The district contains many examples of this type of dwelling in varying degrees of architectural sophistication and amounts of exterior decoration. Fairly plain examples are found at 107 West Main Street [288-5001-0045], 204 West Main Street

Continuation Sheet

Remington Historic District
Fauquier County, Virginia

Section 7 Page 9

[288-5001-0053], 404 West Main Street [288-5001-0058], and 408 West Main Street [288-5001-0059]. The houses at 204 and 206 North Church Street [288-5001-0063 and 0064] are T-shaped cross-gable-roofed dwellings and exhibit Victorian detailing on the exterior. Constructed ca. 1897, 204 North Church Street [288-5001-0063] features a prominent cross gable with a decorative vergeboard, exposed rafter ends, overhanging eaves with brackets, and brick chimneys with corbelled caps (**Photo 8**). The Colonial Revival-style porch with Tuscan columns and awning, as well as the asbestos shingle siding are later additions. The house at 206 North Church Street [288-5001-0064] features a slate roof, exposed rafter ends, and a 1-story projecting front polygonal bay.

The district contains several instances of cross-gable-roofed forms with Queen Anne-style detailing, particularly the use of a projecting 2-story front cut-away bay. Examples include: the Mills House at 206 West Main Street [288-5001-0054] with limited architectural detailing; 300 West Main Street [288-5001-0055] with a very prominent polygonal bay clad in wood shingles, gable-end returns, and a diamond-shaped attic window; and 309 North Church Street [288-5001-0071] with a projecting polygonal bay clad in wood shingles and a pedimented gable end supported by wooden brackets.

A collection of five, early-20th-century, Queen Anne-style dwellings located along North Church Street share similar architectural detailing including hipped roofs with lower cross gables, projecting 2-story polygonal bays, multiple-bay porches, corbelled brick chimneys, and wood or metal shingles in the gable ends. Although no two are identical, they may have been constructed by the same builder, especially since several of them were built for the same family.

The Perrow-Leazer House at 100 North Church Street [288-5001-0060] follows the form of a hipped roof with lower cross gables (**Photo 9**). A 2-story cut-away polygonal bay on the front cross gable features pressed tin shingles in the gable end, as do the other cross gables. The house has 1/1-sash windows, gable-end returns, interior brick chimneys, Gothic-arched attic vents in the gable ends, and a 9-bay wraparound porch with Tuscan columns on brick piers. The house next door at 200 North Church Street [288-5001-0061] shares similar detailing and has the unusual feature of a pressed tin shingle frieze beneath the eaves. The house at 202 North Church Street [288-5001-0062] also features similar Queen Anne-style detailing as well as a front dormer, a denticulated cornice, and an unusual entrance door surround with sidelights that are as wide as the door and contain elaborate panels with etched glass. The houses at 302 and 304 North Church Street [288-5001-0066, 0067] are a bit less subdued in their detailing, but are

United States Department of the Interior
National Park Service

National Register of Historic Places
Continuation Sheet

Remington Historic District
Fauquier County, Virginia

Section 7 Page 10

nonetheless representative examples of the Queen Anne style. The Brittle House at 203 East Bowen Street [288-5001-0002] was constructed ca. 1905 and features many of the same architectural details as the other Queen Anne-style dwellings found along North Church Street including a hipped roof with lower cross gables, a projecting 2-story polygonal bay with gable-end returns, a wrap-around porch, and pressed tin shingles in some of the gable ends.

One of the most ornate Queen Anne-style dwellings in the district is located at 103 East Washington Street [288-5001-0078] and was constructed in 1896. A notable feature is the second-story wall turret clad in wood shingles that sits on top of the porch roof and features a bracketed cornice, hexagonal conical roof, and finial with weathervane. Other detailing includes: slate shingle roofing; a 7-bay wraparound porch with turned supports, brackets, and a spindlework frieze; rear wing with projecting 2-story polygonal bay; cresting on the roof; corbelled brick chimney; elaborate lightning rods; and a shed-roofed wing with a bracketed parapet.

Although several fires destroyed commercial buildings in Remington, the town still contains a fine collection of them along East Main Street, most of which date to the first quarter of the 20th century. Generally they are two- and three-story buildings, most of which are of brick construction. In some cases, the first floor had a commercial use and the upper floors were residential. The earliest and most significant commercial building in the district is the Remington Farmer's Co-op Building [288-5001-0026] at 103 East Main Street (**Photo 10**). Constructed ca. 1903, this magnificent, 3-story, commercial building was built for Sanford Embrey and John Maupin as a store and pharmacy. The shed-roofed brick building is notable for its Classical Revival-inspired cast-iron front manufactured in St. Louis by the Mesker Brothers, large manufacturers of cast-iron work, and was shipped to Remington by train. The cast-iron decoration on the second and third floors consists of 5 bays of paired engaged Corinthian columns on bases with two inset rosettes. The two levels are divided by a heavy cornice with plain frieze. The top bracketed cornice is designed with festoons and fleur-de-lis and features a central metal parapet with side brackets. The intact 6-bay storefront has 2 double-leaf recessed wood and glass entrance doors with transoms and large frame windows with paneled bulkheads. The bays are separated by decorative cast-iron pilasters some of which have bases with the inscription of "Mesker Bros., Front Builders, St. Louis, MO." The first floor is fronted by a 3-bay, shed-roofed porch with square wood supports. The sides of this brick building have brick segmental arches over the 2/2-sash windows, although many of the windows have been enclosed with plywood. This well-preserved building is the only known surviving cast-iron storefront in

Section 7 Page 11

Fauquier County and is also a testament to the financial and commercial vitality of Remington during the early 20th century. The first floor of the building is still used commercially, although many of the upper-floor windows have been covered with plywood.

Another significant commercial building along East Main Street is the Groves Hardware Building [288-5001-0038], constructed in 1905 (**Photo 11**). The facade of this intact 2-story, 3-bay, gable-end commercial brick building features a central double-leaf door flanked by 2/2 windows on the first floor and 3 bays of 2/2-sash segmental-arched windows on the second floor. The elaborately stepped brick cornice is topped by a stepped brick parapet along the front. The building was once used as a poultry house and a painted sign on the brick façade depicts a basket with eggs and the words: "cash for butter, eggs, & poultry." Used as a hardware store for many years, it is still a vibrant commercial building in downtown Remington.

The corner building at 225 East Main Street [288-5001-0027] was constructed in 1918 and was used as the post office for many years (**Photo 12**). The most prominent features of this 2-story, yellow brick building are its angled entry, decorative brick arches, and corbelled belt courses. The projecting 2-story corner angle entrance bay features double wooden doors with a semi-circular multi-light transom topped by a brick round-arch with concrete keystone on the first floor and a window on the 2nd floor. The storefront on East Main Street is comprised of a 3-part recessed entry with storefront windows and wooden bulkhead. This section is fronted by a shed-roofed metal canopy supported by chains. Two side entrances along North Franklin Street lead up to the apartment space on the second floor.

Other notable commercial buildings along East Main Street include: 215/217 East Main Street [288-5001-0028] and 211/213 East Main Street [288-5001-0029], similar 2-story brick buildings from ca. 1915; the Remington Drug Store [288-5001-0030], a 2-story brick building with an intact storefront and decorative brickwork in the cornice and architrave of the second-floor windows; and 111 East Main Street [288-5001-0032], a 2-story brick building that was once used as the town's fire station.

The Remington Town Hall is located in a 1 ½-story vernacular Queen Anne-style building that was constructed in 1913 as the State Bank of Remington and is situated at 203 East Main Street (**Photo 13**). The 2-bay, frame building is clad in pebble-dash stucco and features a prominent 2-bay integral front porch with a pedimented front gable end clad in wood shingles. Other architectural details include exposed scalloped rafter ends, 1/1-sash segmentally-arched windows

United States Department of the Interior

Continuation Sheet

Remington Historic District
Fauquier County, Virginia

Section 7 Page 12

with metal bars, and an exterior metal alarm box. Directly behind the building is a small, 1-story, 1-bay, gable-roofed, frame, 2-cell jail building. Clad in metal siding, the building was constructed in 1915 and includes exposed rafter ends, a central brick flue, 4/4 windows with interior metal bars on the side of building, a formed concrete foundation, and batten door. The jail was last used as such in 1942 and the former bank has been used as the Town Hall since 1959. Perhaps the bank executives hoped having a jail directly adjacent to their building would detract potential robbers!

The Remington Historic District also contains several transportation-related buildings associated with train traffic through town. The warehouse at 100 Tinpot Run Lane [288-5001-0024], just east of the railroad tracks, is a 1-story, frame, gable-roofed building on a concrete pier foundation that is clad in board-and-batten siding and topped by a central 2-story monitor (**Photo 14**). Although no longer in use, the grain storage building which is located just off the railroad tracks is a testament to the significance of agricultural commerce via the railroad in Remington's history. Just west of this building but on the other side of the railroad tracks between the main rail line and the siding is the former freight depot [288-5001-0025]. Now abandoned, this early-20th-century, 1-story frame building has a gable roof clad in slate shingles, a wood pier foundation, exposed rafter ends, sliding batten doors with X braces, a central brick flue, paired 6/6-sash windows and overhanging eaves. One of the few surviving rail-related resources in Remington to survive, this building is remarkably intact. The large feed store at 300 East Main Street [288-5001-0041] is also located directly adjacent to the railroad tracks and probably replaced an earlier building. The concrete block building is very long and features multiple loading bays on the west side as well as freight doors and windows along the side fronting the railroad track.

The architectural evidence in the district suggests that residential construction slowed during the 1920s and up to World War II, in keeping with trends in the rest of the region. Thirteen of the 22 primary resources constructed during this period were dwellings, the rest were commercial buildings. These dwellings tended to be more modest than their earlier Victorian counterparts. Many of these had vernacular forms, while a few used detailing from popular Craftsman/Bungalow or Colonial Revival styles.

The district contains two examples of dwellings with Colonial Revival-style detailing. The Mickey-Neeley House at 205 East Bowen Street [288-5001-001] is 2-story, 3-bay, brick Colonial Revival-style dwelling constructed ca. 1945. It features a gable roof, exterior-end brick chimney,

Remington Historic District
Fauquier County, Virginia

Section 7 & Inventory Page 13

8/8-sash windows topped by a soldier course of brick, 4-light sidelights at the front door, a 1-bay entrance portico with square posts, and a wooden cornice. The Chilton-Hart House at 300 North Church Street [288-5001-0065] was constructed ca. 1941 on the site of the former Remington School (**Photo 15**). The 1 ½-story, 3-bay, frame building features Dutch Colonial Revival-style detailing in its gambrel roof, 6/6-sash windows, and front and rear shed-roofed dormers.

Two dwellings in the district can be categorized as bungalows, but both are very restrained in their use of Craftsman-style detailing: the Dwyer House [288-5001-0049], and 103 West Washington Street [288-5001-0073]. Other contributing dwellings in the district from the mid-20th century include 102 and 102 B East Washington Street [288-5001-0080 and 0081], two buildings that appear to have been constructed by the same builder and share some design elements of the Moderne style.

What is now James Madison Highway through town was designated as Route 15/29 in the state highway system in 1918. As a response to the growing demand for automobile-related services, the district contains a former gas station located at 100 West Main Street [288-5001-0046]. Now converted into a residence, the 1-story building still maintains its characteristic hipped roof and integral front porte-cochere with battered posts on brick piers that once sheltered the gas pumps.

By the early 1950s, the Remington had assumed much of the appearance it still retains today (**Photos 16, 17, and 18**). The district contains 24 non-contributing resources: 3 are dwellings; one is a commercial building; and the remainder outbuildings. With few exceptions, all are generally in keeping with the materials and detailing of the historic resources in Remington and are not visually distracting. Although Remington has continued to grow, much of this development has occurred outside the district boundaries. The Remington Historic District retains its picturesque setting and resources that tell the story of its growth and development as a rural town in Virginia's Piedmont.

REMINGTON HISTORIC DISTRICT INVENTORY

NOTES ON FORMAT AND ORGANIZATION OF INVENTORY:

The properties are listed numerically by street address. All resources are contributing unless otherwise noted in bold and are keyed to the map in regular order.

East Main Street 288-5001-0025

Primary Resource Information: **Depot, Stories: 1, Style: Other, ca 1920**

This abandoned, early-20th-century, 1-story, frame (asbestos shingle), gable-roofed (slate shingle) former freight depot rests on a wood pier foundation and is relatively intact. Details include exposed rafter ends, sliding batten doors with X braces, two 6-panel doors on north side, central brick flue, paired 6/6-sash windows, and overhanging eaves.

Individual Resource Status: Depot Contributing

102 East Main Street 288-5001-0035

Primary Resource Information: **Single Dwelling, Stories: 2, Style: Other, ca 1900**

This 1 1/2-story, 3-bay frame (stuccoed), gable-roofed (standing-seam metal) dwelling features 2 shed-roofed front dormers with paired 6-light windows. Other details include 2/2 windows; exposed rafter ends; 2 interior-end brick chimneys with corbelled caps; 3-bay front porch with square posts; paired 3/1 windows under the porch; 2 square half-story windows in gable ends; and 2 rear 1-story wings with rear porch. The Remington Walking Tour claims the house was constructed ca. 1840. This may be true, but all the exterior elements suggest a ca. 1900 date or perhaps a few decades later.

105 East Main Street 288-5001-0034

Primary Resource Information: Single Dwelling, Stories: 2, Style: Late Greek Revival ca 1888

This 2-story, 2-bay, frame (aluminum siding), gable-end (asphalt shingle) with pediments, ca. 1888 dwelling uses elements of the Late Greek Revival style in its form while the decoration is of the Victorian era and later. The front elevation features a wood door with 4 octagonal panels, a 4-light transom, 3-light sidelights, and a bracketed wooden surround. Next to the door is a full-height 4/8 window with a surround characterized by a stepped entablature. The other windows on the house are 4/4-sash with vinyl shutters. Details include a stone foundation with 4 courses of brick; a central brick chimney with corbelled cap; a 3-bay front porch with Tuscan columns and plain railing; a boxed cornice; a projecting 1-story polygonal bay window on brick foundation on the east side; and a rear 1-story gable-roofed wing on concrete block foundation with side porch and exterior-end flue.

111 East Main Street 288-5001-0032

Primary Resource Information: **Mixed:Commerce/Domestic, Stories: 2, Style: Other, ca 1910**

Constructed ca. 1910, this 2-story, 3-bay, vernacular commercial brick (6-course American bond) building has commercial use on the first floor and residential on the 2nd floor. The first floor has 2 commercial storefronts and a door leading up to the apartments. The storefronts have large windows with brick bulkheads and single and 2-light transom. The first floor is fronted by a 4-bay shed-roofed (standing-seam metal) porch with square posts. The 2nd floor has 2 bays of modern 1/1 replacement windows and infill in the original segmentally-arched openings. The most decorative feature of the building is the elaborately stepped brick cornice. The rear elevation features rear 2-story porches. According to historic photos the building was used as a firehouse. After the 1940s the first floor was changed to reflect the current storefronts.

225 East Main Street 288-5001-0027

Primary Resource Information: **Commercial Building, Stories: 2, Style: Other, ca 1918**

Constructed in 1918, this 2-story mixed-use building is commercial on the first floor and residential on the 2nd floor. It is constructed of yellow brick laid in a 6-course American bond pattern and has 2 entrances along N. Franklin and one with a storefront on E. Main Street. One of the building's most striking features is the projecting 2-story corner angle entrance bay which features double wooden doors with semi-circular multi-light transom topped by a brick round-arch with concrete keystone on the first floor and a window on the 2nd floor. The storefront on E. Main Street is comprised of a 3-part recessed entry with storefront windows and wooden bulkhead. This section is fronted by a shed-roofed (standing-seam metal) canopy supported by chains. Details of this building include: corbelled brickwork as a belt course below the window openings between the 1st and 2nd floors; stepped brick cornice with grouped dentils; brick jack arches above 2nd-floor windows and soldier course above that; 6/1-sash windows; interior brick flues; and flat shed roof with flat parapet. One of the 2 side entrances on N. Franklin Street is made up of a door with transom and window topped by a brick jack arch, while the other is just a single door with transom.

301 East Main Street 288-5002 Other DHR Id #: 288-5001-0026

Primary Resource Information: **Commercial Building, Stories: 3, Style: Classical Revival, ca 1903**

Constructed ca. 1903, this 3-story, shed-roofed (with parapet) commercial brick building has a cast iron front. The cast-iron decoration on the 2nd and 3rd floors consists of 5 bays of paired engaged Corinthian columns on bases with two inset rosettes. Unfortunately, the window openings on these two levels have been plywooded over. The two levels are divided by a heavy cornice with plain frieze. The top bracketed cornice is designed with festoons and fleur-de-lis and features a central metal parapet with side brackets. The intact 6-bay storefront has 2 double-leaf recessed wood and glass entrance doors with transoms and large frame windows with paneled bulkheads. The bays are separated by decorative cast-iron pilasters some of which have bases with the inscription of "Mesker Bros., Front Builders, St. Louis, MO," the manufacturer of the cast-iron front. The first floor is fronted by a 3-bay shed-roofed (standing-seam metal) porch with square wood supports. The sides of this brick building have brick segmental arches over the 2/2-sash windows, although many of the windows have been enclosed with plywood. The building has a rear shed-roofed brick/concrete block wing with stepped parapet. The building is still in use.

Section Inventory Page 22

This 1-story, 3-bay, gable-end (slate), brick (5-course American bond) church combines Romanesque, Gothic Revival and Greek Revival styles. The datestone reads 1884. The gable-end front of the building has gable-end returns, and a projecting rectangular entrance/tower bay with double-leaf doors on the first floor, fronted by a 1-bay pedimented portico. Above it is a triple square-headed window, above which is a round window. The top of the brick tower has brackets with four cross gables that support an octagonal bell tower with Gothic-arched vents and brackets. The side of the church is 4 bays deep with round-arched stained-glass windows, while the front clear-glass windows are square headed. A side 2-story brick education wing is a modern addition.

The side of the house along E. Madison Street reads as the front of the house with 5 asymmetrical bays with 6/6-sash windows, a central front gable with gable-end returns, and a 1-bay porch with battered posts on brick piers. The entrance however is along N. Franklin and presents a 2-story gable-end with a 2-story polygonal bay on front and a side 1-story wing with 2-bay porch with chamfered posts on brick piers. The entrance to the house is from the 2-story section but opens out onto the side 1-story wing. Other details on this fairly large house include interior brick flues, stone foundation, gable-end returns, asbestos shingle siding, and 6/6-sash windows. The vernacular dwelling appears to have been constructed ca. 1890.

West Bowen Street

150 West Bowen Street 288-5001-0070

Primary Resource Information: Church, Stories: 1, Style: Gothic Revival, ca 1872

This 1-story, cross-gable-roofed, Gothic Revival-style church was constructed in 1872, remodeled in 1893, again in 1904, as well as some modern 20th-century alterations and additions. The front is dominated by a projecting cross gable with 3 bays of Gothic-arched windows. Details include: a brick veneer (20th century); Gothic-arched windows; overhanging eaves with brackets; double-leaf wood door; square entrance bay with bell tower topped by finial; gabled entrance hood with Victorian sawn work; colored glass in many of the windows; rear hip-roofed chancel; rear shed-roofed wing; and brick education wing added in 1960.

Primary Resource Information: **Single Dwelling, Stories: 1 1/2, Style: Other, ca 1850**

This stuccoed frame house is comprised of a central 1 1/2-story section which has the entrance door with 2-light transom, an exterior-end stone chimney with brick stack, a gable-roofed wall dormer with 6/6 window and a 4/4 window on the first floor. This section appears to be the oldest and could date to the mid-19th century. To its right (west) is a 1-bay gable-roofed wing with a 6/6-sash window that is probably from the early 20th century. To the right (east) of the 1 1/2-story section is a 1-bay, 2-story, gable-end wing on a brick and stone foundation, with gable-end returns, an interior-end brick chimney, and 2/2-sash windows. This late-19th-century section is tied to the center portion by a 3-bay hip-roofed front porch with turned posts and a spindled frieze. The roofs on all portions of the house are of standing-seam metal. The rear of the house reveals a 6-bay porch that ties to the house to a free-standing, frame (board-and-batten), gable-roofed (standing-seam metal) well house.

8. STATEMENT OF SIGNIFICANCE

Remington is a small town in the southwestern part of Fauquier County in Virginia's agriculturally rich Piedmont region. It is located on the main line of what was the Orange and Alexandria Railroad (now Norfolk Southern Railroad) less than one-half mile from the Rappahannock River. The Remington Historic District, encompassing the oldest section of the town, is significant as a remarkably intact and well-preserved late-19th- and early-20th-century commercial center that retains a significant collection of architecturally distinguished dwellings, mercantile buildings, and institutional structures. As one of only three incorporated towns in the county, Remington was important as both a commercial and transportation center for the rich agricultural area that surrounds the town. Remington is locally significant under Criterion A as a commercial center for the southern portion of the county, represented by an unusually intact collection of late-19th-century and early-20th-century commercial structures. Remington is also locally significant under Criterion C as a well-preserved collection of sophisticated buildings of a quality that is rare in rural agricultural towns in Virginia's Piedmont accompanied by an intact street plan dating from its earliest years.

HISTORICAL BACKGROUND

“Mill View” was the earliest name for what was to become Remington and was derived from a mill that stood on the banks of the Rappahannock River and depicted on an 1876 map as the “G. H. Lewis Mill.” The house is pictured in a history of water-powered mills in Fauquier County, but no mill appears in the picture.¹ Presumably the fledgling town was named for their home. The property was later owned by John W. Stone, as recorded in an 1878 deed from Stone’s widow for the eight-acre Mill View lot, to Daniel J. Payne. One of the earliest surviving houses in the district, located at 106 W. Main Street [288-5001-0050], may be associated with the Rouse family, who at one time occupied “Mill View.” According to a writer in about 1910, the town of Mill View had consisted of “a mill, a church, post office, store and several dwellings...”²

A canal charter was granted by the Virginia General Assembly in 1829 to the Rappahannock Company to construct a canal from Falmouth (near Fredericksburg) to Rappahannock County. The canal company struggled to build the canal, which was not completed until 1849. At Remington, the canal ran on the Culpeper side of the river and most Fauquier farmers shipping produce probably did not use the canal.³ More important to the village that was to become Remington was the charter granting the right to organize the “Orange and Alexandria Railroad,” in March of 1848. According to local histories, Joseph Morgan granted land to the railroad company in 1850 stipulating “that the company would establish a depot at or near his mill on the Rappahannock River known as “Martin’s Mill.”

After 1850, it appears that the tiny village became known as “Bowensville,” for William Bowen, a large landholder in the area who was instrumental in securing the railroad depot on the Fauquier side of the river when the railroad was built and according to a writer in 1910 “was all energy in making the town grow.”⁴ Officially the town retained that name until the 1870s when it changed to “Rappahannock Station”, a name by which it had informally been known from the arrival of the railroad throughout the Civil War period.

All military maps of the Civil War period called the town “Rappahannock Station.”⁵ The military maps also show a cluster of buildings a short distance from the north bank of the river. Rappahannock Station was strategically located between two major fords on the Rappahannock, the Beverley Ford and Norman’s Ford. The maps from August of 1862 depict the Federal lines on the north side of the Rappahannock and the Confederate forces on the south side of the river. The best sketch map of activity at Rappahannock Station dated March 28, 1862, shows a road

**National Register of Historic Places
Continuation Sheet**

**Remington Historic District
Fauquier County, Virginia**

Section 8 Page 44

(likely the present-day Main Street) running west to east towards the railroad tracks with the notation "all these houses belong to Mr. Bowen."⁶ The sketch map also shows gun positions, "high ground," and earthworks in the area around Rappahannock Station. According to other military maps, the railroad depot on the Orange and Alexandria was located south of the river in Culpeper County. A monument in the National Cemetery in Culpeper, which is dedicated to the memory of Pennsylvania soldiers, cites four battles at Rappahannock Station, in August and November of 1862, a reference that indicates Remington's strategic importance on the railroad and near a primary Rappahannock River crossing. The military activity in this area is recorded in materials prepared by the National Park Service for a multiple property document entitled "The Civil War in Virginia 1861-1865."⁷

The first Episcopal church in Remington planned within the town's boundaries was St. Luke's. Mr. and Mrs. William Bowen, large landholders in the area, donated 30 acres for the new church and a rectory. The rectory, completed in 1860, was built first and was used for services until the sanctuary could be completed. Lumber and other materials were stockpiled in preparation for building the church; however, according to the history of St. Luke's, construction was delayed because of the outbreak of hostilities in April 1861. The Reverend John Cole who was serving the parish reported in 1865-66 that "Since my last report of 1861, cruel war has raged...our rectory and materials for the new church were utterly destroyed by the Federal Army during the winter of 1863-64." Services were held at a local Methodist church in the following years, and on May 27, 1877, the congregation "passed a resolution to build their church upon the site of the earlier church." The congregation elected to sell 20 of the 30 acres that it had received from William Bowen to finance the new church. The sale of the land was finally completed in 1884. The cornerstone for the present St. Luke's was laid in a Masonic ceremony on August 11, 1881, and the church was consecrated on the original 10-acre Bowen land on October 18, 1888 by Bishop Francis U. Whittle [288-5001-0069]. Land Tax records for 1900 show that by 1900, St. Luke's owned 6 acres in Remington.⁸ A vicious windstorm destroyed the steeple of the church in 1937, and it was determined that the building could not support a new steeple with a heavy bell. A lower tower was designed and completed that same year.⁹

The Methodist church for the village of Rappahannock Station was organized in 1868 and originally met in a private school building that stood on the Rouse property [288-5001-0050] on Main Street. The new church was completed in 1872 and was remodeled in 1893 when the steeple was added, with a Sunday school room added in 1904 [288-5001-0070].¹⁰ The bell tower and steeple were moved to the corner of the building in 1904 as well. Apparently in 1900

Continuation Sheet**

**Remington Historic District
Fauquier County, Virginia**

Section 8 **Page** 45

the church was not considered to be located within the town limits as it does not appear with the other two churches in the Land Tax records of that year.

The Baptist congregation in Rappahannock Station was organized in 1874. Land for the church was donated by the Embrey family and the bricks were made locally. The church was dedicated in 1889. Tax records show the Baptist Church as standing on a one quarter-acre parcel in Remington. The Remington Baptist Church stands on East Marshall Street [288-5001-0083].¹¹

The building of the Orange and Alexandria Railroad, later the Southern Railway, and now Norfolk Southern, was always critical to the growth and prosperity of Rappahannock Station/Remington. At the time of the Civil War, the railroad depot was actually located in Culpeper County as depicted on the most detailed Rappahannock Station Battlefield sketch map.¹² Contemporary maps showed the railroad depot on the Fauquier side of the Rappahannock.¹³ None of these depots or rail-related structures survives today. The only historic railroad building in the district is a freight depot dating from the early 20th century that was later used as a warehouse and is now abandoned [288-5001-0025]. The railroad that ran from Alexandria to Orange, accompanied by a bridge and several fords crossing the Rappahannock River, made this area particularly vulnerable to military attention during the Civil War.

Lying at the heart of one of the richest agricultural areas in Virginia, Remington's access to rail service provided for the growing importance of the town for farmers in the area. Milk from surrounding dairies was shipped by rail from Rappahannock Station to Washington every day with the "empty cans com[ing] back on the night train," as recalled by a long-time resident, the late Grace Rouse Ashby.¹⁴ The types of buildings in Remington continue to reflect the importance of the agricultural economy to the town as well as its growth as a commercial center in the late 19th and early 20th centuries.

Although Remington rebuilt in the post-war years, and continued as a small center for commercial and mercantile activities in the immediate post-war years, the tax records for Fauquier County do not list it separately as a town until 1900. The official incorporation as a town in 1890 marked the debut of the town as an important community in the county.¹⁵ In addition to the churches that had been completed by 1890--the Episcopal, Methodist, and Baptist denominations--a rich collection of sophisticated dwellings associated with the leading families of Remington is a testament to its prosperity in the late 19th century. Several houses survive

Continuation Sheet

Remington Historic District
Fauquier County, Virginia

Section 8 Page 46

today that were standing at the time of Remington's incorporation including the Bowen House at 207 East Bowen Street [288-5001-0003], associated with the family that along with the Stone family owned most of the land on which Remington is located in the mid-19th century; the Luther Allison House, built ca. 1888 at 300 N. Franklin Street [288-5001-0007]; the house at 100 Sumerduck Road, ca. 1880 [288-5001-0042]; the Daniels House at 105 E. Main Street, ca. 1888 [288-5001-0034], and the Bowen-Burroughs House at 105 E. Washington Street [288-5001-0079].

But the largest residential building boom seems to have taken place in the two decades after incorporation and again is a measure of the prosperity of the town. Thirteen houses on North Franklin Street were constructed between 1890 and 1914, and eight houses on West Main Street, six on North Church Street, and five on Washington Street. The tax records for 1900 list a number of the prominent families in Remington. The Bowen family who lived at 207 E. Bowen Street [288-5001-0003] appear in the tax records as owning three parcels in Remington, all in the name of Georgia Bowen Trustee and all with building improvements, the largest amount being \$500. One of the improved lots was described in 1910 as being "the old school lot." This indicates that she was widowed and was holding the property in trust. Apparently, Remington, or in its earlier guise as Rappahannock Station, never assigned lot numbers to its parcels and, therefore, it is difficult to link individual structures to present-day addresses. However, it is highly likely that S. D. Embrey owned at least one of the residential houses by 1900 as he is taxed for a number of lots, each of which had buildings valued at between \$300 and \$600. B. F. Perrow is taxed for a $\frac{3}{4}$ -acre parcel with \$1000 worth of buildings that probably is 100 Church Street [288-5001-0060]. S. G. Brittle is taxed for a one-acre parcel with \$600 worth of buildings at 204 Church Street [288-5001-0063]. R. F. Hume is taxed for a $\frac{2}{3}$ -acre parcel with \$600 improvements, which may be 309 Church Street [288-5001-0071]. Evidence suggests that these structures all date to the period before 1900. A. C. Allison is taxed for a lot with \$1675 worth of improvements, indicating that this may have been a commercial structure. It is possible that this structure stood on the lot where the old post office and grocery store built by Luther Allison in 1918 stands today. P. B. Lewis was a large property owner with four lots ranging in size from a lot to 6-1/4 acres. The largest lot was probably the location of his house, which was valued at \$400 and stands today at 106 West Main Street [288-5001-0037]; but he also owned a $\frac{1}{2}$ -acre parcel with \$3000 worth of buildings, which likely were commercial structures.¹⁶ According to local historian, Mary M. Root, Dr. John Burroughs had a house built in 1896 at 103 E. Washington Street, [288-5001-0078]. Although tax records do not reflect this building, John Burroughs is charged with a 3-acre parcel and a city lot. It is unclear why Evelyn Humphreys in

Remington Historic District
Fauquier County, Virginia

Section 8 Page 47

her detailed description of Remington and its residents in 1910 failed to mention a physician in the town.¹⁷ By 1910 Lucie Burroughs is charged with a city lot with \$600 improvements; and in 1920 John Burroughs is charged with a lot with \$900 improvements.

According to a local resident writing about 1910, one of the key factors in securing incorporation for the town was the right to "control the sale of intoxicants." The writer declares that "no saloon has existed since."¹⁸ Apparently there were at least three "bar rooms" prior to incorporation and some attribute the effort to incorporate to ridding the town of bars.¹⁹ The charter prohibited the sale of alcoholic beverages within the town's corporate limit or anywhere within one mile of those boundaries and was strictly enforced by the town council. The name of the community was officially changed with incorporation, apparently because the name "Rappahannock Station" was often confused with "Tappahannock," the county seat of Essex County. There are several explanations for the selection by local citizens of "Remington," the most prevalent being that there was a popular Southern Railway train conductor who was called Captain Remington of whom the Rappahannock Station residents were particularly fond.²⁰

No commercial or mercantile buildings in Remington survive from the 19th century. Since virtually all structures in the town were destroyed during the fierce fighting in the area, Remington was forced to rebuild most of its infrastructure in the post-war years. Because of Remington's convenient location on one of the main north-south rail lines, it became an important shipping point for "sumac, wool, tan bark, scrap iron, railroad ties, [and] lumber." Large volumes of grain and flour were shipped as well due to the proximity to several mills along the river side.²¹ A handful of "store houses" were constructed during the 1870s. None of these commercial buildings survive from the 19th century, with many succumbing to fires in 1895, 1919, and 1926. The 1895 fire burned the Embrey Store where the present Farmers Coop Building [288-5001-0026] stands and threatened other mercantile structures on Main Street. The 1919 fire burned six stores on Main Street; and the June 30, 1926, fire totally destroyed 14 buildings in the business section of Main Street.²²

As with the dwelling houses in the town, a huge burst of building of commercial and mercantile building occurred in the early years of the 20th century. Ms. Humphrey writing in 1910 describes the activities and buildings in the area, saying that Remington has

"two flouring mills, a machine shop, four mechanics shops, one lumber yard, one hardware store, one drug store, one furniture store, three dry goods

United States Department of the Interior

Section 8 Page 48

stores, one general feed store, two grocery stores, one millinery establishment, one post office, one bank, one telegraph office, one commodious depot, two telephone lines, three livery stables, three licensed boarding houses; also one produce dealer and shipper, one manufacturer of lumber and pile dealer, two contractors and buildings, one dealer and contractor of slating, one brick layer, one tinner, four painters, one paper hanger, one fertilizer dealer, one sand shipper, one undertaker, two poultry breeders, one well-drilling contractor two strawberry truckers, one real estate agent, three insurance agents five traveling salesmen, one justice of the peace, one notary public, and one professor of music."²³

One of the most distinctive commercial structures in Remington is the Farmers Coop at 103 East Main Street [288-5001-0026]. The excellent iron front of this building, manufactured by Mesker Brothers Front Builders of St. Louis, is a testament to the sophistication of Remington. It can be assumed that the elaborate iron front arrived by rail. No other small towns in the area could boast such a structure. The building was constructed in 1903 for Sanford Embrey and John Maupin as a store and pharmacy. The tax records indicate that it was valued at \$1000 in 1910.²⁴

In the 1920s and 30s, it welcomed Frank Hoff's poolroom and square dancing on the third floor. The Grove Hardware building on East Main Street [288-5001-0038] was constructed in 1905 for H. P. Woodward and tax records assign the building a value of \$2000. "For many years a poultry house, the sign on the brick face reads "Cash for butter, eggs & poultry". An advertisement by Woodward in the August 17, 1914, edition of the Remington Booster confirms this activity. In the 1920s, 30s, and 40s, the building housed a movie theatre on the second floor. Today it serves as a hardware store.²⁵ The Remington Drug Company on East Main Street [288-5001-0030] was built in 1908 for A. W. Smith's Dry Goods & Notions with its building taxed at \$1300; it later became a pharmacy operated by Will H. Ashby and is currently operated by an Ashby family member. The Old Post Office at 225 East Main Street [288-5001-0027] was built in 1918 as a post office and grocery store operated by Luther Allison. It is likely that Luther Allison's brother, A. C. Allison, also operated a commercial establishment in Remington as he is charged with substantial buildings in both 1900 with \$1675 worth of improvements and 1910 with \$1600. Possibly the earlier Allison structure was burned in 1918 and replaced with the later operation. It now houses the Remington Community Variety Store.

Other surviving commercial buildings on Main Street include two 1915 buildings at 217/215 East Main Street [288-5001-0028] and 213/211 East Main Street [288-5001-0029]; and a 1920

Fauquier County, Virginia

Section 8 Page 49

commercial building built for a Mr. Daniels at 107 East Main Street [288-5001-0033] and used as a boardinghouse in the 1920s. The State Bank of Remington structure on East Main Street [288-5001-0031] was constructed in the early 1910s and may have replaced a larger building located elsewhere on Main Street. A prominent advertisement for the bank appears in 1914 in one of Remington's intermittent newspaper ventures, the Remington Booster. An impressive banking structure would have been particularly important in Remington because of the large amount of commercial activity in the town as well as the fact that Remington was the nexus for much of the agricultural commerce in the southern part of Fauquier County. Although the Fauquier National Bank of Warrenton did not have a building in Remington, it still advertised in the Booster, a measure of the potential clients who lived in the town. The State Bank of Remington building has housed Remington Town Hall since 1959. The town's jail that stands on the town hall lot, was built in 1915 for \$214 and contained two cells.²⁶ The Booster also displayed ads from Remington Hardware, The Remington Drug Company, the Remington Poultry House, and Wellford Harris, watchmaker and jeweler. In a subsequent issue on May 2, 1915, reference is made to the Stribling House, as "the oldest boardinghouse in Remington, only 100 yards from the depot." It is not clear whether the Stribling House still stands, although there are several houses in the 100 block of East Main Street that likely could have been described as being in close proximity to the depot. An A. P. Stribling is charged with a 4-1/2 acre parcel with \$1000 worth of improvements in the 1920 tax records. Boardinghouses were common in railroad towns since often train crews were in need of such residential facilities. The Booster also advertised the Remington Flour Mill as the "Imperial Pride of Remington," again a measure of the importance of agricultural products to the well being of the small town.²⁷

It is interesting to compare the total value of improvements on lots in the town in the 20th century. In 1900, buildings on the lots for tax purposes totaled \$24,000. By 1910, that total has risen to \$49,000; and by 1920 to \$64,000. It is a measure of the growth and prosperity of Remington that improvements rose nearly three-fold in 20 years, despite destructive fires. The tax records reveal another interesting social fact: there was only one "colored" property owner in 1900 who owned one unimproved lot. In 1910, there again was only one African-American landholder in the town and his lot had \$50 worth of improvements. In 1920 no African-American landholders are listed. This is particularly significant because there were a number of African-American landholders throughout the county. Whether this was a conscious act of exclusion is debatable; but it is curious to note that Ms. Humphrey writing in 1910 states that "Remington having no foreign capital invested, is noted for its conservative and hospitable spirit prevalent in the history of Virginia; and no negro owns a foot of land in [sic] the incorporated

Section 8 Page 50

*limit.*²⁸

Another measure of the prosperity of Remington in the early 20th century is the existence of sidewalks as early as 1910. A postcard from 1910 illustrates Church Street in that year, and shows both sidewalks lining the street and fences enclosing the residential lots. Remington's Main Street in a 1925 photo shows sidewalks and a paved street with two-story commercial structures, often with two-tiered porches fronting on Main Street.²⁹ In 1923, The Remington Press, a successor newspaper to the Booster, announced a public sale of stock for the Remington Electric Light and Power Company. This operation was apparently located on the site of a mill near the railroad tracks that, according to a local resident, was "fixed up" so the town could have electricity. A surviving eight-foot-high dam was used to power the plant.³⁰

None of Remington's early school buildings survive. The house at 300 Church Street, known as the "Chilton House" was built in 1941 [288-5001-0065] on the old Remington School lot. It is said that stones from the school were used to construct the foundation of the house, which was built for John B. Chilton. The modern elementary school for the area stands outside the district boundaries.

Despite devastating fires as well as major floods that occurred in 1937 and 1942, Remington retains a large collection of dwellings and commercial structures that date from the decades from 1920-1945. The railroad continued to play a primary role in the economy of the town and provided important transportation for both agricultural goods and passengers north to Washington and south to Atlanta. Commercial buildings on Main Street include 204 East Main Street [288-5001-0039], which dates to 1926 and may have been built as a grocery store and later used for a lumber yard. Another commercial building [288-5001-0040] and a feed store, [288-5001-0041] both dating from ca. 1940, point to the continued economic vitality of Remington as late as World War II. A former gas station dating from the 1930s stands at 100 East Main Street [288-5001-0046] and attests to the growing demand for automotive services. Since James Madison Highway carries U. S. Route 15 across the Rappahannock, there would have been considerable demand for such facilities. The trace for Route 15 in Remington appears on the sketch map of Rappahannock Station drawn in 1862. What is now Route 15/29 was designated a road in the state highway system in 1918, with the bridge spanning the Rappahannock at Remington being a primary crossing point from Fauquier to Culpeper County and points south. It was in 1925 that the railroad became double track.

A 1927 geography supplement produced by the Fauquier County School Board and the University of Virginia describes Remington as having an accredited high school in the town (which no longer survives); a bank, flour and corn mills (no longer in place); lumber dealers, two garages, a drugstore, three grocery stores, a bakery, a tile factory, an electric light plant, feed stores, meat markets, a tinner, jeweler, a shoe shop, a restaurant and a pool room.³¹ Although not all these operations survive into the 21st century, Remington does retain a remarkable core of both commercial and residential structures that display a high level of architectural quality and a substantial amount of architectural integrity. Its streets are named for early national leaders--Franklin, Marshall, Madison, and Washington--and sidewalks continue to line most of the streets. Remington's three major churches survive in their 19th-century forms and locations and the town's main street is still lined with merchants and businesses associated with agriculture. The population has remained relatively static since the 1920s, but Remington survives today as the embodiment of a once-thriving commercial center for the county.

VERBAL BOUNDARY DESCRIPTION:

The boundaries of the nominated Remington Historic District are included within a polygon whose vertices are marked by the following UTM reference points: A 18 255558E 4269223N; B 18 255609E 4268893N; C 18 255579E 4268807N; D 18 255457E 4268624N; E 18 255386E 4268538N; F 18 255183E 4268655N; G 18 254787E 4268868N; H 18 254797E 4268944N; I 18 255031E 4268842N; J 18 255153E 4269243N; K 18 255239E 4269289N; L 18 255249E 4269243N; M 18 255208E 4269070N; N 18 255472E 4268984N; and O 18 255442E 4269060N.

BOUNDARY JUSTIFICATION:

The Remington Historic District boundaries were drawn to include the largest concentration of historic buildings remaining as originally planned in the town of Remington. Blocks which have been more recently developed and lost their historic context, as well as more rural and non-contributing properties, are excluded. The district boundaries coincide with property lines and natural landscape features whenever possible.

SUPPLEMENTARY LISTING RECORD

NRIS Reference Number: 05000395 Date Listed: 5/5/2005

Property Name: Remington Historic District County: Fauquier State: VA

Multiple Name _____

This property is listed in the National Register of Historic Places in accordance with the attached nomination documentation subject to the following exceptions, exclusions, or amendments, notwithstanding the National Park Service certification included in the nomination documentation.

for Patrick Andrews
Signature of the Keeper

5/5/2005
Date of Action

Amended Items in Nomination:

This SLR makes a technical correction to the boundary. In Section 10 of the nomination form (continuation sheet 54) the Verbal Boundary Description (VBD) of the district is defined as a polygon marked by UTM points. The nomination form for the district includes a detailed scaled site map (scale 1 inch = 150 feet) which more accurately defines the boundary than the UTM points. In consultation with the VA State historic preservation office, the form is amended to have the site map be the official boundary of the Remington Historic District.
